YOUNGSTER'S VIEWS OF LIFE

To Be Compelled to Give Affection Is
Something They Cannot Al-
ways Understand.

The world seems to be full of what may be called canalized emotions. One is "supposed" to love one's aunt or one's grandfather in a certain definite way, at the risk of being "unnatural." One gets almost a sense of the quantitative measurement of emotion. Perhaps the greatest tragedy of family life is the useless energy that is expended by the dutiful in keeping these artificial channels open, and the correct amount of current running. It is exactly this that produces most infallibly the rebellion of the younger generation. To hear that one ought to love this or that person; or to hear loyalty spoken of as the older generation so often speaks of it, as if it consisted in an allegiance to something which one no longer believes in—this is what soonest liberates those forces of madness and revolt which bewilder spiritual teachers and guides. It is exactly those dry channels of duty and obligation through which no living waters of emotion flow that it is the ideal of the younger generation to break up. They will have no network of emotional canals which are not brimming, no duties which are not equally loves.—Randolph S. Bourne in Atlantic.

SEA TONNAGE LITTLE KNOWN

Nautical Terms That a Landman as a
General Thing Has Small Ac-
quaintance With.

There is a great deal of confusion in the public mind regarding the "tonnage" or "displacement" of ships, and with good reason, for there are four distinct methods of calculating tonnage. In the case of warships the term displacement is almost always used. The displacement tonnage is the space occupied by the vessel in the water. The amount of water displaced by the ship is equal in weight to the ship and all it contains. As one ton is equal to 35 cubic feet of water, the displacement tonnage is found by dividing the number of cubic feet of water displaced by 35, when the ship is immersed up to its load line.

Gross tonnage is a term commonly applied to merchantmen. In calculating it, the whole interior capacity of the ship below the tonnage deck is found, including that of all covered-in spaces on deck used for stowage, and the result in cubic feet is divided by 100. Net register tonnage is the gross tonnage minus all the spaces used for the accommodation of the crew and instruments and the working parts of the ship. The dead-weight tonnage is the measure of the exact amount of cargo a ship can carry with safety.

GOOD ADVICE.

"Have you an old saw you can lend me?" asked Dobson. "I want an old one so it won't matter to you if I happen to break out a few teeth."

"I haven't the kind of old saw you mention," said Gadsforth, "but I can give you another sort I always abide by."

"Another old saw?"
"Yes, 'Neither a borrower nor a lender be.'"

WE HAVE THEM NOW—As we have received our large importation of Holland grown bulbs of all kinds—METCALFE THE FLORIST.

To Clean Combs.
Put two tablespoonfuls of ammonia in a basin of warm water, and let the comb remain in this solution about one-half hour. Remove, and wipe dry. The comb will be spotlessly clean.—Woman's Home Companion.

The DAIRY

SANITATION IN DAIRY HOUSE

Extreme Care and Cleanliness Should
Be Observed to Prevent Entrance
of Bacteria into Milk.

Unless considerable care is taken large numbers of bacteria may find their way into the milk during the process of milking. Cows should be milked in clean, well-lighted stables. After grooming and before milking, the udders, flanks, and bellies of the cows should be carefully wiped with a damp cloth to remove any dust or loose hairs which might fall into the milk pail. Only those persons who are free from communicable disease should be allowed to handle milk or even enter the stable or dairy house.

After the cows are prepared for milking each milker should thoroughly wash his hands and put on a pair of clean overalls and a jumper or

Open and Small-Top Pails.

wear a suit which is used for no other purpose. The suit must be kept clean and occasionally sterilized with steam or by boiling in water. The milking stool must also be clean, to avoid soiling the milker's hands.

The small-top milk pail is a necessity in the production of clean milk, as it presents only a small opening into which dust and dirt may fall from the air or from the cow's body. It has been found by experience that the use of this kind of pail greatly reduces the number of bacteria in milk from average dairies. Many types of milk pails are for sale, but any tin can convert an ordinary pail into a small-top pail by the addition of a hood.

USE PATIENCE WITH CALVES

Young Animals Must Be Handled Care-
fully—Can Be Taught to Drink
Milk Very Easily.

Handle the new-born calf as you would a baby.

First of all, keep it warm, and be sure it gets its first milk warm from its mother.

Keep it clean and keep the mother free from excitement.

If you separate the calf from its mother on the third day, give it the milk warm from its mother.

With a little kindness and patience, young calves can be taught to drink very easily.

Never jam a calf's head up to its eyes in milk—it is cruel.

Let the calf suck the finger; carefully release the finger, and the job is done.

FEEDING SILAGE TO CALVES

Yearling Animals Will Consume About
One-Half as Much as Mature Stock
—Keep Free From Mold.

Calves may be fed silage as soon as they are old enough to eat it. It is perhaps of greater importance that the silage be free from mold or decay when given to calves than when given to mature cattle. They may be given all the silage they will eat up clean at all times. Yearling calves will consume about one-half as much as mature stock; that is, from 15 to 20 or more pounds a day. When supplemented with some good leguminous hay, little, if any, grain will be required to keep the calves in a thrifty, growing condition.

Contagious Abortion.

Cows affected with abortion disease, long after they have seemingly recovered and resumed the normal production of calves, continue to expel abortion bacilli with their milk. One cow now under observation has continued to discharge such bacilli with her milk without showing a symptom of disease for more than six years.

For Success With Dairy.

The right kind of a man will feed his cows liberally of economically produced feed and he will have a silo. He will care for them properly and breed them properly, and gradually improve his herd year by year, and there seems to be no limit to this, at least the limit has not been reached as yet.

Keep Record of Everything.

Keeping production records is only half the work. How much did it cost you to feed that cow that gave you 6,000 pounds of milk last year? Keep records and keep them.

GIRLS NEED PHYSICAL DRILL

Bending Over Desks Often Has a
Tendency to Cause Curvature
of the Spine.

One who observes girls in graduating classes in different high schools can hardly fail to be impressed with their lack of good physical development, says the Mother's Magazine. It is safe to say that at least one-third of the girls graduated from high school have curvatures of the spine, or uneven shoulders, or stand in a bad position, or have too much flesh or too little. Investigations made recently in California showed that about three-fourths of the girls who go to college and university are out of repair physically.

What is the cause of all this? The prevailing theory is that high-heeled shoes, constriction in dress and lack of any systematic exercise are responsible; but the chief reason why girls are so poorly formed is because practically no attention has been given to their physical development until very recently. In some schools girls still do not have any regular physical exercise. They are not advised by capable teachers regarding their defects and how to overcome them. The California report indicated that many defects were due to habitual bending over desks, which develops curvature of the spine, which in turn develops other deformities. But conditions are probably better today than they were a few years ago. A girl's dress seems better adapted to helpful physical development than it was ten years ago. Perhaps this will in time be demonstrated in the better physical development of girls who pass through the schools.

NOISY

Owl—What are you calling the janitor down for?

Squirrel—I was mistaken. I thought the steam pipes were making that terrible racket we heard, but it seems it was that woodpecker family that has moved in above us.

ANGERED THE IRISHMAN.

"Confound this Dublin," muttered the perspiring Scotch recruit, after an evolution executed at the double. "And confound dirty Glasgow," hissed an Irish voice in his ear, "and I'll knock the head off of you when we dismiss."—London Globe.

REASONABLE EXCUSE.

"You say you had your eyes open, with a good grip on the wheel and your foot on the brake?"

"Yes."
"Then how in Tophet did the accident happen?"

"Easy. I had to sneeze."

INSTRUCTIONS.

New Train Robber—But what shall I do if the passengers refuse to hold up their hands?

Old Train Robber—Pass yourself off as a moving picture actor who's got on the wrong train by mistake."

OSTENSIBLE OCCUPATION.

"Does Bliggins work?"
"No. He has an office downtown so that he can keep out of the way of the servants in his house."

HIS IMITATION.

"My dog is like an impressive orator who asks a question."
"How is that?"
"He paws for a reply."

NO DOUBT.

She—Do you think bats really can get in your head?
He—You try one, and you won't ask that next morning.

THE KIND.

"Your stories of the West Indies need more ginger."

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD

Practically a Daily at the Price
of a Weekly. No other News-
paper in the world gives so
much at so low a price.

There never has been a time when a newspaper was more needed in the household. The great war in Europe has now entered its second year, with no promise of an end for a long time. These are world-shaking events, in which the United States, willing or unwilling, has been compelled to take a part. No intelligent person can ignore such issues.

The Presidential contest also will soon be at hand. Already candidates for the nomination are in the field, and the campaign, owing to the extraordinary character of the times, will be of supreme interest. No other newspaper will inform you with the promptness and cheapness of the Thrice-a-Week edition of the New York World.

THE THRICE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and the Hopkinsville Kentuckian together one year for \$2.65. The regular subscription price of the two papers is \$3.00.

Unusual Offer To Our Readers.

For a limited time, and subject to withdrawal after 30 days, the well-known publishing house of the J. B. Lippincott Company, Philadelphia, founded in 1792, offers to the readers of this paper a 12 months' subscription to "Lippincott's Magazine" and a year's subscription to the Kentuckian, both for \$3.00. This is the price of a twelve months' subscription to "Lippincott's" alone. Additional to obtaining every issue of this paper for a year, our readers will receive in "Lippincott's," 12 great complete novels by popular authors, 105 short stories, crisp, entertaining, original 45 timely articles from the pens of masters, and each month some excellent poems with the right sentiment, and "Walnuts and Wine," the most popular humor section in America. To obtain this extraordinary offer prompt action is necessary. Remit to J. B. Lippincott Company, Washington Square, Phila., Pa.

Glass windows were first used in private houses in England in 1180.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drugstore. 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

Victrola VI, \$25

Other styles \$15 to \$200

You are never
at a loss for en-
tertainment when
there is a Victrola
in your home.

It enables you to hear
the world's best music
whenever and as often
as you wish.

Come in and we'll
demonstrate the
Victrola and play
any music you wish
to hear. We'll ex-
plain our system of
easy terms, too.
